

3- Printing – Vehicles

1. Change body and door “Shell” to .5 inches (1/2 inch). **BE SURE TO DO THIS FOR ANY PARTS THAT YOU DERIVED FROM THE BODY!!**
2. Create a sketch and extrusion on the XY plane that will cut the vehicle in ½.

3. Save as “Front Half”.
4. Repeat the same process for the “Rear Half”

5. **Export**>**CAD Format** >**stl** for both body sections.
6. Change the diameter of your “Axle” to 1.4 inches.
7. Export all parts as “stl” files.
